

replication

Usage

```
create replication <volName> remote=<server:volName> type=async|async-safe|sync|snapshot
    [controller=<eth-interface>] [syncrate=<rate-percent>] [options=<repliOptions>]

delete replication <volName>

bind replication [volName]

unbind replication [volName]

set replication <volName> interval=<none|frequent|hourly|daily|monthly>
    [period=integer] [keep=integer] [offset=integer]

set replication <volName> [groupTag=string]

show replication [<volName>|<snapName>]
```

Examples

```
mayacli create replication sql_vol remote=server2:sql_vol_mirror type=sync controller=eth1 syncrate=50
mayacli create replication sql_vol remote=mayanas-ha2:testvol3 type=snapshot
mayacli show replication
mayacli set replication interval=daily period=3 keep=8
```

Output

```
[root@mayanas-ha1 ~]# mayacli show replica
VOLUME REMOTE TYPE SIZE STATUS
testvol1 -> mayanas-ha2:testvol1 snapshot 50.00G initial
testvol3 -> mayanas-ha2:testvol3 sync 10.00G uptodate Thu Sep 6 23:39:44 2018
```
