performance

The performance object shows performance information for active volumes.

Usage

```
show perf   [volume=<volname>|*] [controller=iscsi|fc|fc<n>]
                     [mem=all] [cpu=all|cpuN]
                  interval=<intervalValue>
```

Examples

```
mayacli show perf controller=fc1

mayacli show perf controller=iscsi

mayacli show perf volume=testvol1
```

Output

```
mayacli show perf cpu=all
    %user     %system   %iowait   %idle
    0.00      0.00      0.00      100.00
    0.00      0.00      0.00      100.00

mayacli show perf mem=all
