# rg

The command component rg is for creating and managing software raid groups.

## Usage

```
create rg   [label=]<rgname> [description=text] force=[1|0]
               raidLevel=raid0|stripe|raid1|raid5|raid6 spareCount=<count>
               (disk=<device-name>) ...
bind rg               <rgname> (disk=<device-name>) ...
unbind rg   <rgname> (disk=<device-name>) ...
set rg               <rgname> [online=yes|no] [disk=<device-name>] [writeprotect=yes|no]
show rg               [<rgname>]
```

## Examples

```
mayacli create rg raidtest raidlevel=raid0 disk=/dev/sda disk=/dev/sdb disk=/dev/sdc
mayacli create volume raidvol rg=raidtest
```

## Output
