

zpool

Usage

```
create zpool [label=<poolname>] [description=text] force=[1|0]
  [raidlevel=mirror|raidz|raidz1|raidz2] options="zpool-opts">
  (disk=<device-name>) ...
bind zpool <poolname> (disk=<device-name>) ...
unbind zpool <poolname> (disk=<device-name>) ...
set zpool <poolname> [online=yes|no] [disk=<device-name>] [writeprotect=yes|no]
show zpool [<poolname>]
```

Examples

```
mayaccli create zpool tank raidlevel=raidz2 disk=/dev/sda,dev/sdb,/dev/sdc
mayaccli show zpool tank
```

Output

```
mayaccli show zpool
Configured zpools:
Name Type Status Size Disks
----- mayaccli show zpool
Configured zpools:
Name                Type      Status      Size      Disks
-----
testpool1           pool     ONLINE     199G     sdb
[root@mayanas-ha1 ~]#

-----

testpool1 pool ONLINE 199G sdb
[root@mayanas-ha1 ~]#
```
